

# Win

# Fount X008

## FOR SILVER IMAGE AND ALUMINIUM PLATES

### PRODUCT DESCRIPTION

Win Fount X008 has been specially formulated to enable the production of fast clean copies from silver image plates (with paper or polyester back) and aluminium plates. Changing fountain solution when changing from silver image to aluminium plates or vice versa isn't necessary with Win Fount X008.

Win Fount X008 provides the perfect ink/water balance on both conventional and integrated dampening systems and is completely compatible with rubber and oil based inks.

### DIRECTIONS FOR USE

Remove previous fountain solution and clean system before use. Check condition of dampening system; desensitise steels, clean or replace worn dampening covers, remove glaze from rubber rollers. The recommended standard dosage is 4% vol/vol resulting in a pH value of 4.8 - 5.3. In alcohol dampening systems usually an addition of 4-6% isopropyl alcohol is sufficient. With covered dampeners alcohol is not required.

### MAJOR POINTS

- Performs perfectly on all dampening systems
- Compatible with both rubber - and oil based inks.
- Low water: immediate high density clean prints
- Low down time: optimal ink transfer and clean backgrounds mean less blanket washing.

### PACKAGING

5, 10, 20 litre cans

## Bousfield

#### Manufactured by

Bousfield BV

P.O. Box 365, 4870 AJ Etten Leur  
The Netherlands
