

Win

System ALK

DAMPENING SYSTEM CLEANER

PRODUCT DESCRIPTION

Win System ALK is a highly effective, alkaline system cleaner for all fountain solution circulation systems. Cleans the entire system and is especially designed for heavily contaminated circulation systems. Win System ALK is, because of its alkalinity, recommended to clean "acid" systems.

NOT SUITABLE FOR USE DURING PRINTING.

Win System ALK can be used when odour and contamination occurs after prolonged press stops.

DIRECTIONS FOR USE

Add 5-10% (vol/vol) Win System ALK, depending on the degree of contamination, to the water in the system. Ensure this product is circulated for 3-4 hours. Check filters and pumps regularly and clean when necessary. Finally empty the system and neutralize the product. Rinse thoroughly with water before adding the fountain concentrate.

MAJOR POINTS

- Alkaline cleaner for all fountain solution circulation systems
- Highly effective cleaner
- Designed to clean heavily contaminated systems

PACKAGING

5 and 200 liter cans

Bousfield
