

Win

Wash RG2

ROLLER DEGLAZING GEL

PRODUCT DESCRIPTION

WinWash RG2 is a roller gel, especially designed for the removal of dried ink from ink rollers and blankets. WinWash RG2 removes the last ink deposits out of the pores of the rubber and will therefore rejuvenate the rubber surface. Regular treatment of the ink rollers will prevent the occurrence of stripping during the printing process and will keep your rollers in an optimal condition. WinWash RG2 does not contain hydrocarbon solvents. This gel is water based and contains biodegradable solvents and surfactants, which exhibit excellent stability.

DIRECTIONS FOR USE

Wash the rollers with a normal wash. Apply WinWash RG2 on the rollers and allow the product to penetrate. Apply the wash up blade, rinse and when necessary, clean with wash. Avoid contact with printing plates.

MAJOR POINTS

- Designed to remove dried ink
- Rejuvenates the rubber
- Removes calcium deposit
- Prevents stripping when used regularly
- Free of hydrocarbons
- Water based and biodegradable
