

# Win

# Wash RG1

## CALCIUM REMOVING GEL

### PRODUCT DESCRIPTION

WinWash RG1 is a roller gel, especially designed for the removal of calcium deposits from ink rollers and blankets. WinWash RG1 does not only remove calcium deposits, but will also remove the last ink deposits out of the pores of the rubber and will therefore rejuvenate the rubber surface. Regular treatment of the ink rollers will prevent the occurrence of stripping during the printing process and will keep your rollers in an optimal condition.

Win Wash RG1 doesn't contain hydrocarbon solvents. This gel is water based and contains biodegradable solvents and surfactants, which exhibit excellent stability. Avoid contact between WinWash RG1 and plates.

### DIRECTIONS FOR USE

Wash the rollers with a normal wash. Apply Win Wash RG1 on the rollers and allow the product to penetrate. Apply the wash up blade, rinse with water and when necessary, clean with wash.

### MAJOR POINTS

- Designed to remove calcium deposits from ink rollers and blankets
- Rejuvenates the rubber
- Prevents stripping when used regularly
- Free of hydrocarbons
- Water based and biodegradable

### PACKAGING

1 litre bottles
