

Win

Wash UV1

GENERAL PURPOSE UV WASH

PRODUCT DESCRIPTION

Win Wash UV1 is a blend of solvents for the removal of UV cured inks from non-EPDM blankets and rollers. Win Wash UV1 has low odour characteristics and excellent solvency power.

DIRECTIONS FOR USE

For rollers:

Apply with a wash-up bottle to rollers and run-in. Use scraper blade to remove ink and solvent. For colour changes it is recommended that two applications be made. This product is suitable for use on Nitrile and Nitrile/PVC roller coverings. If good housekeeping practices are maintained, (ensure rollers are dry after washing with solvent and a final wash with clean water) and then this wash may be used with good quality EPDM coverings. If in doubt consult your roller manufacturer.

For blankets:

Apply with a rag or lint free wipe. Allow a few seconds for solvent to penetrate ink film and then wipe down. Finally wash blanket with clean water.

Do not allow Win Wash UV1 to come into contact with the image areas of unbaked positive plates.

MAJOR POINTS

- Powerful UV ink solvent.
- Low odour

PACKAGING

5, 20, 200 and 1000 litre cans/drums/containers.
